6) With due deference I beg to state that it is unusual to specify anything about minerals in a certificate of approval. A reference to Rules 3 to 6 of the Rules for the grant of licences & leases & Form No. 1A of the certificate of approval will make the position clear. It is for consideration whether, having regard to the object of the Certificate of approval, whether the words "with respect to mineral minerals may stand in the draft

7) The draft as approved may be unusual. But it does not appear to be illegal. It is necessary to take the pre-caution of adding the words "with respect to unreserved minerals". Rule 3, says "nor will the transfer or assignment of any license or lease to any person be sanctioned, unless such person holds a valid certificate of approval." Rule 47 says, the lessee shall not assign his lease or transfer any right or interest thereunder to a person expect with the previous sanction of Government." In the case of Chrome blocks that Messrs. Oakley & Bowden took by transfer, the Director, Department of Geology, reported that as there was a valid certificate of approval the consent of Government may either be presumed or be given without objection. ~~I am referring to that file by recollection.~~ If the certificate of approval is granted un-conditionally without specifying that it applies only to un-reserved minerals, transfers of lease of unreserved minerals may take place when such transfers are not in contemplation of Governme
